## DETAILED ACTION

### ***Election/Restrictions***

- 1.** Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

**Group I, claims 1-27**, drawn to an optical disc recording apparatus, a method of recording information on an optical disc, and an optical disc.

**Group II, claims 28-35**, drawn to an optical disc reproducing apparatus.

- 2.** The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the optical disc reproducing apparatus corresponding to Group II (claims 28-35) lack the technical features corresponding to the optical disc, in particular, the recited optical disc having pits and lands or marks and spaces which are represented by integral multiples of a basic length wherein a sequence of data based on auxiliary information is modulated by a signal represented by a combination of a sequence of pseudo-random numbers and a predetermined periodic signal.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
